===== SINGLE QUOTES =====
Single quoted string: Hello $name
Literal content: This is a literal $name and it is not expanded.

===== DOUBLE QUOTES =====
Double quoted string: Hello Bhanu
Spaces preserved: Hello Bhanu, welcome to WSL
Nested tokens: The value is: "Bhanu"

===== VALIDATION =====
Single quote validation: PASS
Double quote validation: PASS

===== EDGE CASES =====
Single quotes preserve $name literally.
Double quotes expand Bhanu.
Spaces    remain inside single quotes.
Spaces    remain inside double quotes.
