=====
PART 1: PROCESS ESCAPE SEQUENCES
=====
1. Escape sequences:
Hello
World
Column1 Column2

2. Escaped spaces:
File name: my\ file.txt

3. Escape special symbols:
Dollar: $100
Ampersand: \&
Asterisk: \*
Question mark: \?

4. Preserve characters:
Hello $USER and \* special characters

5. Validate parser output:
Parser validation: PASS

6. Test complex input:
Complex input: Hello\ World\ $USER\ \&\ \*

=====
PART 2: CHILD PROCESSES
=====
1. Creating a child process...
Child process is running.
Child PID: 865
Child process completed.

2. Executing a program:
Fri Oct  2 15:36:08 UTC 2026
```

```
=====
bhanu@DESKTOP-DE32HQ8:~/quotes_practical$ ./process_practical.sh Hello WSL
=====
PART 1: PROCESS ESCAPE SEQUENCES
=====
1. Escape sequences:
Hello
World
Column1 Column2

2. Escaped spaces:
File name: my\ file.txt

3. Escape special symbols:
Dollar: $100
Ampersand: \&
Asterisk: \*
Question mark: \?

4. Preserve characters:
Hello $USER and \* special characters

5. Validate parser output:
Parser validation: PASS

6. Test complex input:
Complex input: Hello\ World\ $USER\ \&\ \*

=====
PART 2: CHILD PROCESSES
=====
1. Creating a child process...
Child process is running.
Child PID: 870
Child process completed.

2. Executing a program:
Fri Oct  2 15:36:16 UTC 2026

3. Passing arguments:
Arguments: Hello WSL
```
